

Established in 2008, Sphinx Glass is one of the fastest-growing, independently operated float glass producers in Egypt and the MENA region with a leading market share in each of its segments, including architectural and automotive float glass.

Production commenced in April 2010, producing clear float glass and Sphinx Glass was the first manufacturer of tinted and float glass in Egypt.

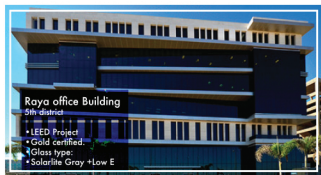

The company's state-of-art production – 100 Km from Cairo and 120 Km from the port of Alexandria- is one of the most advanced of its kind in Egypt spanning across 220,000 square meters, and producing at an annual capacity of 200,000 tonnes.

The plant houses a four-meter wide float line, which allows for the production of a large range of glass sizes, with thicknesses ranging from 2mm to 19 mm.

The company is wholly-owned by Construction Products Holding Company (CPC), one of the region's largest manufacturers of the complete range of building materials.

The facility supplies the local market with high quality float glass, and its strategic location within easy reach to one of Egypt's main sea ports offers superior logistics services and access to the major export markets. And today Sphinx Glass products are available in more than 40 countries across the Globe.

The range of products, from Clear Float to Tinted Float and Pyrolytic Reflective Float, offers sustainable solutions for energy conservation and environmental protection.

This success is driven by the company's consistent quality, ethics and responsibility toward its customers, shareholders, employees and the environment. Known for the superior quality of its products, thanks for using the advanced manufacturing technology, backed up by PPG (Vitro) Industries as the primary know-how and technology provider, strict quality assurance and world class raw materials..

To ensure the production of the highest quality of glazing, automotive, silvering and reflective glass under stringent international standards, Sphinx Glass acquired ISO 50001:2011 for Energy Management Systems, 2015-14001 for Environmental Management Systems, 2015-9001 for Quality Management Certificate, 18001:2007 for Health and Management Systems.

Furthermore, all Sphinx clear and tinted glass products are CE-marked and follow EN 9-572; and the "Solarlite" and "Vistalite" Reflective glass follow EN 1-1096.

In recent years, glass fabricators have made significant advances in their technologies, creating a range of decorative glass applications that are increasingly specified by architects who seek distinctive, colorful or visually interesting designs. And Sphinx Glass has significantly contributed to changing the architectural character of Egypt by offering a wide range of architectural glass for façades and windows that met the needs of the design aesthetics. Products varies in tints from skyblue to bronze and grey and vary in coatings whether it's Vistalite or Solarlite. All products are made according to international criteria, that's why they presented a new standard in architectural glass in Egypt, giving an impression of sophisticated beauty and provided high performance in thermal insulation and energy saving.

Sphinx Glass has promoted energy saving concepts by providing glass for many green buildings in Egypt. Some of the LEED awarded landmarks are Mall of Egypt (Vertical Façade- Silver Certified), Galleria 40 (Gold Certified), Bank Audi Head Quarter (Gold Certified)
