

Integrated Management Systems Policy

ISO 9001:2015, ISO 14001:2015, ISO 45001:2018 and ISO 50001:2018, ISO 27001:2013, ISO 22301:2019 and ISO 20000-1:2018

Sphinx Glass is a leading manufacturer of float glass (Trulite Clear Glass, Isolite Tinted Glass, And Solarlite, Vistalite Coated Glass) with different thicknesses. The company always seeks to cover all the needs of the local and international markets.

To stay ahead, management always strives to achieve the following:

- Providing products of the highest quality at competitive prices and saving costs.
- Achieving the highest levels of customer satisfaction.
- Enhancing export opportunities and opening new markets.
- Protect the environment and reduce the environmental impact
- Maintain occupational health and safety for employees, suppliers, contractors and visitors.
- Ensuring the Quality of management systems

To ensure this, Sphinx Glass is committed to the following

- Complying with legal and other requirements.
- Establishing, implement and maintain an integrated management system.
- Periodic review and improved performance improvement for the effectiveness of integrated management systems.
- Optimizing the sustainable use of resources and contributing to mitigating climate change by maintaining and expanding green spaces within the company.
- Setting measurable objectives and setting performance indicators for the integrated management system
- Upgrading the level of performance and skills of all employees through active training programs.
- Ensure that the integrated management system policy is communicated to all employees, suppliers, contractors, the public and interested parties.
- Addressing all potential health risks and threats related to the nature of work to ensure a safe work environment and protect all workers and individuals who deal with the company, such as visitors and contractors, from being exposed to any harm by eliminating the hazard and reducing the risks.
- Ensure the participation and consultation of all administrative levels, as well as all workers.
- Forming an Energy Committee responsible for ensuring energy efficiency as a continuous process and as an essential component of new equipment, upon replacing, renewing or when designing.
- Applying the principles and techniques of cleaner production.
- Seeking leadership in energy and environmental designs LEED and improving energy performance.
- Seeking (WCM) World Class Manufacture.
- Considering energy efficiency as a selecting criteria.
- Providing an infrastructure that relies on effective Information Technology and Asset Management, ensuring the confidentiality of information through controls and policies related to it, and maintaining business continuity by studying and addressing risks and threats in the company
